

Nugro Tech Pvt Ltd

Experienced App Development Team

Never Give Up. Always Grow with Technology.

Turn Your App Idea Into Revenue

Who We Are

Product-Focused Mindset

We build scalable, secure, and market-ready digital solutions with long-term code quality and security-first architecture.

Transparent Partnership

Budget-friendly solutions without compromising quality, with clear communication and long-term business relationships.

Expert Team

3-5+ years of professional experience delivering reliable digital products across multiple platforms.

Core Services

Custom Application Development

Android, React Native, cross-platform solutions with API integration.

Full-Stack Web Development

React, Next.js, Node.js, Express.js for SaaS and web platforms.

Shopify Development

Store setup, theme customization, public app development (NT Signify, NT Notifier, NT Chatbot Studio, NT Smart Alert).

Custom Software Development

Warehouse management, order management, payment systems, business automation.

Technologies We Master

Backend

Node.js, Express.js, Java, Kotlin for scalable server-side development

Frontend

React, Next.js, Remix.js, React Native for responsive interfaces

Cloud & DevOps

AWS primary infrastructure, Docker containers, GitHub CI/CD pipelines for secure deployment

Tools

Jira, Slack, GitHub, VS Code for team collaboration and code quality

Our Product Portfolio

We develop and maintain scalable solutions that power business operations across multiple platforms.

NT Chatbot Studio

Smart Chatbot Analytics Dashboard for e-commerce, offering detailed insights.

NT Notifier

Dashboard for managing real-time notifications and alerts for Shopify stores.

NT Signify Customizer

Control variant restock settings and product customization for Shopify.

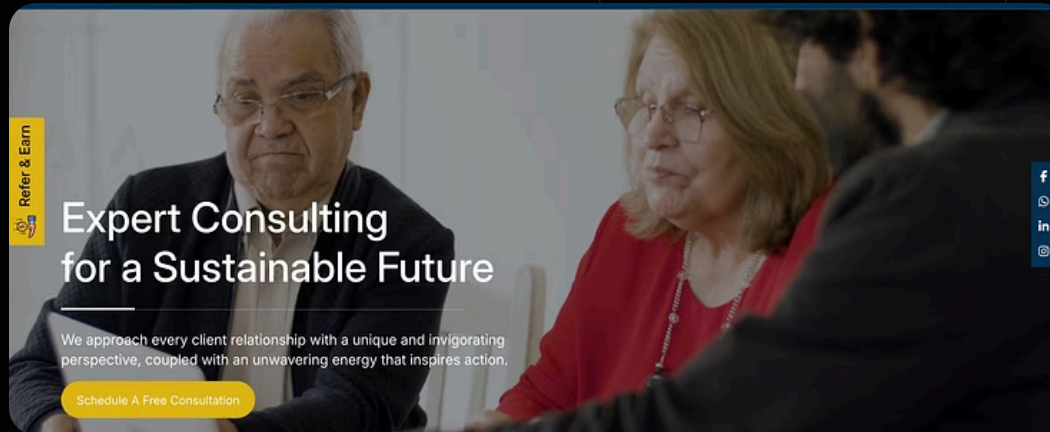

NT Smart Alert

Manage checkout alerts and smart notifications to optimize conversions.

Selected Projects

An overview of products and services we've delivered for enterprise and mid-market clients.

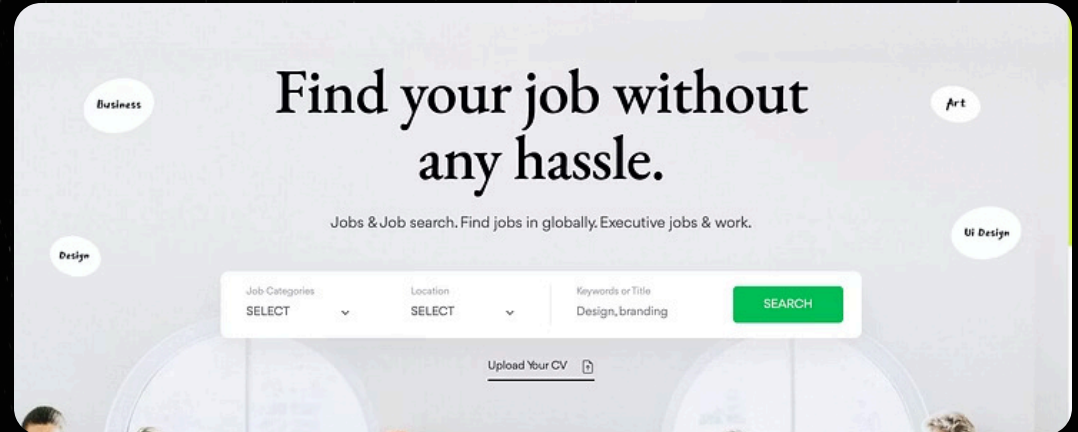

Refer & Earn

Expert Consulting for a Sustainable Future

We approach every client relationship with a unique and invigorating perspective, coupled with an unwavering energy that inspires action.

Here are some of our key projects:

- **NxGenTech IT:** Developed website and technical infrastructure for a USA staffing company (nxgentechit.com).
- **Job Sphere:** Built a Canada job marketplace platform with comprehensive frontend and backend development.
- **Warehouse Management System:** Created custom software for streamlined order management, payment tracking, and warehouse operations.
- **HereToday:** Android application designed for tracking daily deals and time-sensitive offers.

Software Development Expertise

Enterprise-Grade & Custom Solutions

Our software engineers design modular code architectures that support large-scale implementations while maintaining clean code structure and testing coverage. We specialize in warehouse management systems, order management, payment processing, print generation, and business automation tools for small, medium, and large-level businesses across staffing, e-commerce, agriculture, and service industries.

Why Choose Nugro Tech

Product-Based Mindset

Strong backend architecture and scalable code design.

Quality & Security

Secure, crash-free, optimized applications with clean maintainable code structure.

Long-Term Partnership

Transparent communication, reliable support, and budget-friendly pricing without compromising quality.

SEO-Friendly Development

Performance-optimized solutions with focus on quality over quantity and long-term success.

Ideation to Launch

Strategize

Research domain properly and align business goals with technical feasibility.

Design

Plan architecture, define requirements, and design user flows.

Build

Agile implementation using modern tech stack with regular progress reviews.

Launch

Deploy on AWS with Docker, monitor performance, and iterate based on feedback.
